Scholarships and research funds can be obtained (e.g., Mahajyoti, BARTI, ICSSRI)

## What is research?

Research is a systematic and scientific investigation of a problem.

It involves a search for new knowledge, interpretation, or verification.

It is a highly intellectual activity.

## Stages of academic research

1. Identification of a research problem

2. Review of literature

3. Formulation of objectives / hypotheses

4. Research design and methodology

5. Data collection

6. Data analysis

7. Interpretation of results

8. Conclusion and recommendations

9. Report writing and publication

## Stages of academic research

### 1. Identification of a research problem

- Choose and clearly define a topic or question
- Hamlet is a tragic hero.
- Why do many P.G. students of English hesitate to speak English in class?
- Plants grow faster in sunlight.
- What factors contribute to graduate unemployment in urban areas?

## Stages of academic research

### 2. Review of literature

Study existing research to understand what is already known.

- What has already been done in the chosen area
- Critical articles, books and research papers
- Journals dedicated to specific fields
- JSTOR, Web of Science, Scopus, Shodhganga

## Stages of academic research

### 3. Formulate objectives/hypotheses

Set aims or testable statements.

- What the study aims to achieve (objectives) or what is to be tested (hypotheses)
- Objectives guide the direction of the study, while hypotheses are testable predictions on the literature review

### 3. Formulate objectives / hypotheses

- **Use of symbolism in a novel**  
Objective: To analyze the major symbols used in *The Old Man and the Sea* and their meanings
- **Effect of fertilizers on plant growth**  
Hypothesis: Plants given organic fertilizer will grow taller than plants without fertilizer.
- **Relationship between study habits and academic performance**  
Hypothesis: Students who follow regular study schedules perform better in exams than those who do not.

## Stages of academic research

### 4. Research design and methodology

- This explains how the research will be conducted.
- Approach, methods, tools, sample selection, and procedures used to collect and analyze data.
- A clear methodology ensures the research is systematic and reliable.

### 4. Research design and methodology

- **Character development in a novel**  
The researcher uses qualitative textual analysis, closely reading the novel
- **Testing water purity**  
The researcher uses an experimental method, collects water samples, tests them in a laboratory using chemical indicators, and records measurable results.
- **Impact of online learning on students**  
The researcher uses a survey method, selects a sample of students, designs questionnaires, and analyzes responses using statistical tools.

## Stages of academic research

### 5. Data collection

- Gathering information required for the research.
- The type of data collected depends on the research field and methodology.
- Data may be primary (first-hand) or secondary (already existing).

### 5. Data collection

- **Themes in a novel**  
**Example:**  
The researcher collects data by selecting relevant passages, dialogues, symbols, and themes directly from the literary text and related critical works.
- **Measuring temperature changes**  
**Example:**  
The researcher collects data by conducting experiments, taking temperature readings using thermometers or sensors, and recording observations in tables.

## 5. Data collection

- *Study of voting behavior*

### **Example:**

The researcher collects data through surveys, interviews, questionnaires, or official statistics from government records.

## Stages of academic research

### 6. Data analysis

- Data analysis involves organizing, examining, and interpreting collected data to find patterns, relationships, or meanings.
- The methods of analysis depend on the nature of the data and the research discipline.

### 6. Data analysis

- *Imagery in poetry*  
types of imagery (nature, emotional, symbolic) and interpreting their meanings using literary theory.
- *Relationship between income and education*  
The researcher analyzes survey data using statistical tools such as percentages, averages, or charts to identify trends and correlations.

## Stages of academic research

### 7. Interpretation of results

- What the analyzed data signifies.
- The researcher connects findings with research objectives, hypotheses, and previous studies to understand their meaning and importance.
- The methods of analysis depend on the nature of the data and the research discipline.

## 7. Interpretation of results

### ➤ *Symbolism in a novel*

How symbols represent deeper themes like freedom or oppression and how they support the overall message of the novel.

### ➤ *Plant growth experiment*

The researcher interprets results by explaining why plants exposed to sunlight grew faster, relating findings to the theory of photosynthesis.

## 7. Interpretation of results

### ➤ *Impact of education on employment*

The researcher interprets survey results to explain how higher education levels increase employment opportunities, supporting or rejecting the hypothesis.

## Stages of academic research
