5. Data collection

6. Data analysis

7. Interpretation of results

8. Conclusion and recommendations

9. Report writing and publication

Stages of academic research

4. Research design and methodology

- This explains how the research will be conducted.
- Approach, methods, tools, sample selection, and procedures used to collect and analyze data.
- A clear methodology ensures the research is systematic and reliable.

4. Research design and methodology

- ***Character development in a novel***
The researcher uses qualitative textual analysis, closely reading the novel
- ***Testing water purity***
The researcher uses an experimental method, collects water samples, tests them in a laboratory using chemical indicators, and records measurable results.
- ***Impact of online learning on students***
The researcher uses a survey method, selects a sample of students, designs questionnaires, and analyzes responses using statistical tools.

Stages of academic research

5. Data collection

- Gathering information required for the research.
- The type of data collected depends on the research field and methodology.
