Fortune at the bottom of the pyramid

- Two brand names Pureit and Aquasure are a great example of changing the bottom of pyramid marketing's distribution system. The company has abandoned its usual direct selling to selling through retail channels in BOP markets in India and other countries.
- The best bottom of pyramid innovation example is the Aravind eye clinics. They have leveraged technology and created a new business model where surgeries are performed on a manufacturing line have helped them improve scalability and provide eye surgeries to India's population.
- Unilever markets its brands in mini and micro sizes wherein the product is priced at ten rupees or less and this means that this bottom of the market can afford it.
- Further, Coca Cola has mini bottles that cost less than ten rupees making it affordable and within reach of this segment.

Reverse Innovation – Definition and Examples

Reverse Innovation is the strategy of innovating in emerging (or developing) markets and then distributing/marketing these innovations in developed markets. Many companies are developing products in emerging countries like China and India and then distributing them globally.

Tata Motors – Tata Nano

While companies like Ford set up its global automobile platform in India and catered to the niche premium segments in India, Tata introduced the Tata Nano for the price conscious consumer in India in 2009. Tata plans to launch Tata Nano in Europe and U.S. subsequently.

Procter and Gamble (P&G) – Vicks Honey Cough – Honey-based cold remedy

P&G's (Vicks Honey Cough) honey-based cold remedy developed in Mexico found success in European and the United States market.

Nestle – Low-cost, low-fat dried noodles

Nestle's Maggi brand – Low-cost, low-fat dried noodles developed for rural India and Pakistan found a market in Australia and New Zealand as a healthy and budget-friendly alternative.

Nokia – New business models

Nokia's classified ads in Kenya are being tested as new business models. Nokia also incorporated new features in its devices meant for U.S. customers after observing phone sharing in Ghana

Godrej – Chotukool Refrigerator

In February 2010, Godrej Group's appliances division, Godrej & Boyce Manufacturing Co Ltd test-marketed a low-cost (dubbed the world's lowest-priced model at Rs 3,250) refrigerator targeted mainly at rural areas and poor customers in India. The product runs without a compressor on a battery and cooling chips. The company wants to use a community-led distribution model (as an alternative channel of distribution) to push for product growth.

Tata – Swacch – World's cheapest water purifier

Swacch means clean in Hindi. Tata launched the water purifier – Tata Swacch targeting the rural market in India with the cheapest water purifier in the market. The product does not require running water, power or boiling and uses paddy husk ash as a filter. It also uses silver nanotechnology. It can give purified water enough to provide a family of five drinking water for a year. The company feels it will open a whole new market.

Pepsico – Kurkure and Aliva

Pepsi is planning to give developed markets (particularly West Asia) a taste of its salted snack Kurkure (and also another snack Aliva). The product enjoys huge success in India and has become a Rs 700 crore brand within a decade of its launch. The success is attributed to product innovation and a good marketing strategy. E.g. Made from corn, rice and gram flour, zero per cent trans fats and no cholesterol, Rs-3 small packs for pushing sales in the lower-tier towns.

KFC – Taco Bell – Yum! Restaurants

KFC test-marketed Krushers, a range of chilled drinks in the cold beverages segment in India and Australia and plans to introduce it to other markets. The launch in India was very successful as 'Krushers' accounts for 8 per cent of KFC's beverage sales in India. Yum! Restaurant's Tex-Mex chain Taco Bell has one Indian-designed dessert (tortilla filled with melted dark chocolate) on Taco Bell's US menus.

LG – Low-cost Air Conditioners (AC)

South Korea based LG Electronics (LG) planned to develop low-cost air conditioners targeting the middle and lower-middle classes in India. Their goal was to manufacture air conditioners at the cost of air coolers which were very common.

Coca-Cola – eKOCool

Coca-Cola's Indian arm Hindustan Coca-Cola Beverages introduced eKOCool, a chest cooler operating on solar energy with a capacity to store about 4 dozen 300 ml glass bottles. The innovation also charges a mobile and solar lanterns. Coca-Cola has plans to pilot the innovation in different cities in India and may be it will introduce it in other developed countries as well.

Coca-Cola – Minute Maid's Pulpy

Minute Maid's Pulpy was extremely popular in China. It was basically an orange juice with pulp. Coca-Cola introduced it in other countries as well.

Amazon's BOLD hiring strategy in India

In 2011, Amazon launched a unique hiring programme in India called Building Operations Leadership (BOLD). BOLD is a MBA hiring programme wherein the company takes in students with around two to four years of pre-MBA work experience. This practice differs from its global leadership development programme 'Pathways' which requires prior work experience of 7.5 years. With its success, BOLD is being introduced in other markets as well.

Tata – Swacch – World's cheapest water purifier

The term Swacch means "clean" in Hindi. Tata developed the water purifier – the world's cheapest at the time of its release in India – to serve the rural sector. It does not require running water, electricity, or even boiling. The device is made out of paddy husk ash and uses silver nanotechnology. It can supply enough clean water for a family of five for a year. The Swacch water purifier is an example of reverse innovation because it was designed to meet the needs of consumers in developing countries, rather than developed countries. It is a low-cost alternative to more expensive water purifiers and meets the specific needs of these markets.

Competitive Advantage

Competitive advantage refers to factors that allow a company to produce goods or services better or more cheaply than its rivals.

Example:

- **Elon Musk and Tesla Motors** have proved the well-established myth that electric vehicles are ugly and slow is wrong. Moreover, they have proved that electric cars can look absolutely gorgeous. And in the electric sports car market, they still don't have any serious competition.

- A classic example of great product differentiation based on people's emotions is Coca-Cola.

Coca-Cola is positioning its products as **happy**, meaning that they bring joy, **harmony**, etc. Coca-Cola constantly implements emotional branding strategies and marketing campaigns that attach an emotional value to products.

- **Starbucks Excellent customer service** is one source of Starbucks' competitive advantage. Starbucks' emphasis on ensuring a positive customer experience has allowed it to become one of the leading firms in the coffee industry.
- **Apple's** - The iOS on iPhones is different from Google's Android, whereas the MacOS on the Mac computers is significantly different from Microsoft's Windows. The company also designs its own mobile processors in order to **provide unmatched performance and better optimization with its own software.**
- Nike uses a **product differentiation strategy** and efficient brand management that allow the company to perform better than other brands in the athletic clothing and footwear industry. Nike demonstrates the uniqueness and value of its products. The most crucial components of Nike's differentiation strategy are widespread recognition and constant innovation. Compared to other footwear manufacturers, Nike enjoys the highest level of brand awareness. The iconic logo and slogan "**Just do it**" contributed to the even greater popularity of the brand.
- **McDonald's - Cheap prices** is McDonald's main competitive advantage. The company is engaged in an extensive utilization of economies of scale to achieve the cost advantage. True to 'fast food' format of its restaurants, McDonald's is famous for the speed of customer service without compromising the quality of the service
- **Amazon** : The main element of competitive advantage of Amazon is that it provides a **great customer service experience**, such as easy to operate, fast online order, smooth checkout, and stress-free returns.

Notice

B.Sc. Part II (Statistics) students are informed that, on October 18th and 19th, the seminar will be held under the Internal Examination Scheme (Semester-III) for Paper-V and Paper-VI. However, all students have to prepare a seminar plan accordingly after looking at their seminar topics and attend the seminar. The time duration of the seminar will be ten minutes. Attendance of all the students for the seminar is compulsory. Those students who will give the seminar as per the given schedule will be awarded internal marks.

- Note: The seminar schedule and topics will be sent to you on what's app group.

Date and time: 18th and 19th October 2023.
