College Index No. J 22.04.002

Criterion-VII: Institutional Values & Best Practices

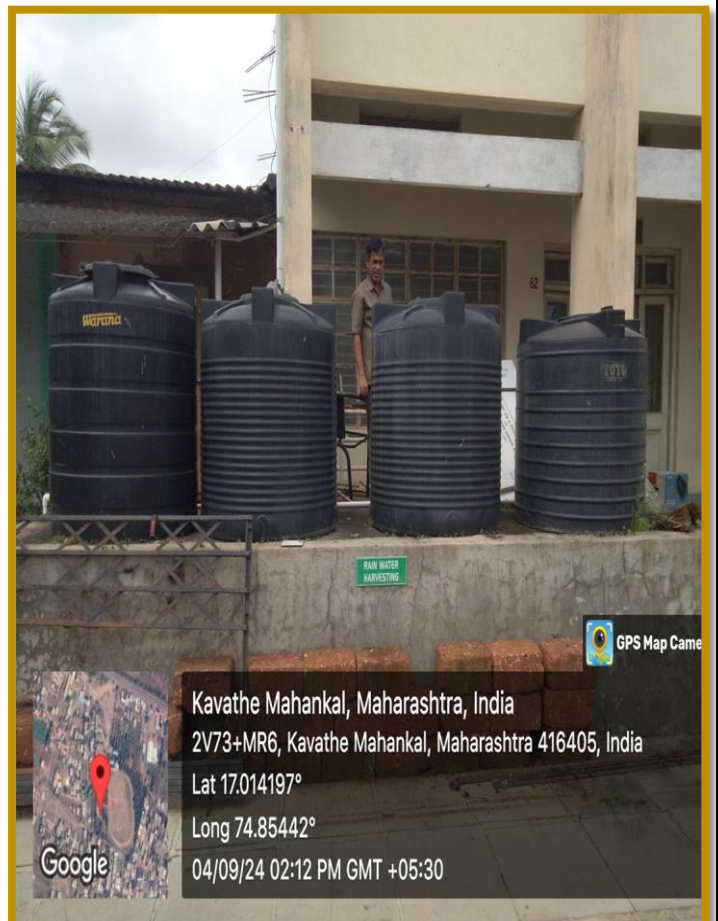

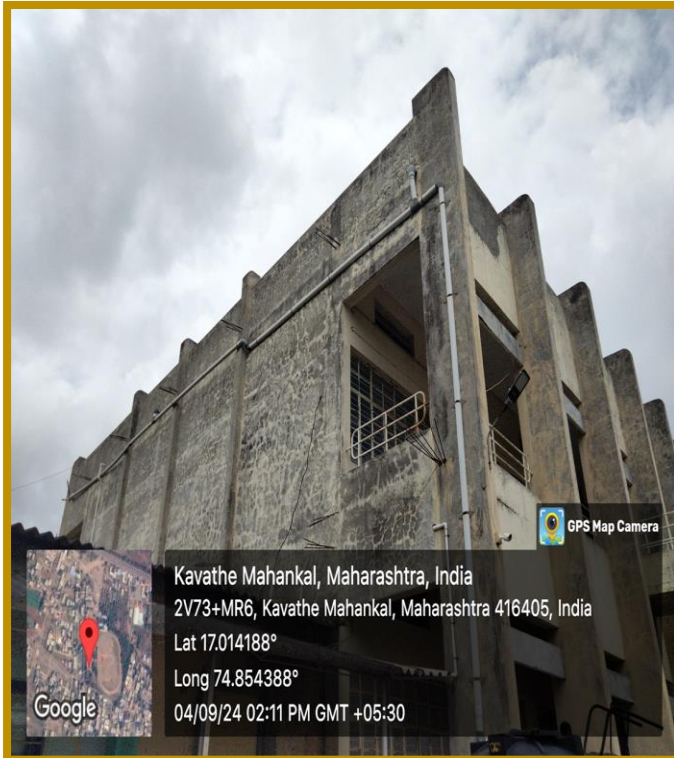

Indicator 7.1 Institutional Values & Social Responsibilities

7.1.2 Facilities & initiatives for Water conservation

The college is located in drought prone region. The college depends on ground water for all its water needs. Hence, efficient usage of available water and adaptation of water conservation measures are essential.

- The college is having rain water harvesting system. In this rain water is channelized through drain pipes which are next collected to water containers which is used as source of water for Chemistry Labarotary.
- The college has drip irrigation system for plants in campus which ultimately conserves water.
- *Save Water* boards are attached at every source of water in the campus.
- Water from roof of annex building is colected and passed to underground pipes to borewell recharge
