## **General Information**

### **Preamble**

The last decade of the last century witnessed the sweeping effect of the globalization, liberalization, privatization and computerization of our public and private sector organizations. It is due to the impact of the amazing development in the field of information communication technology. The World Bank, the World Trade Organization, the International Monetary Fund, the International Agreements like GATT have made 'global competition' inevitable and imperative. Foreign Universities have challenged our traditional system of Higher Education. It has compelled us to strive hard for equality, assurance and excellence in our Higher Education. One of the most significant measures of Total Quality Management in Higher Education is the concept of 'Lead College'.

### **Mission**

A homogenous cluster of 10 to 15 colleges within an area fostering inter-institutional co-operation for overall development of all of them is the basic principle behind the concept of the 'Lead College'. The concept is based on the belief, "Efforts of each and welfare of all". In western countries 'Lead Colleges' are now a matter of routine activity. But for us, it is a very recent idea still to be talked about. Our mission is to make our colleges and the institutions of HE (Higher Education) achieve nationally and internationally acceptable standards.

### **Epilogue**

The concept of a Lead College having 'its own cluster' and working towards quality enhancement with mutual understanding and co-operation, is a recent one. We don't have any previous experience of the implementation of the scheme. In Maharashtra, the Shivaji University has initiated the action and designed the 'scheme of the Lead Colleges' for the University. (At present the University has ten Lead Colleges within its jurisdiction of three districts). The University, therefore, is prepared to make suitable amendments in future if necessary, in the light of the actual experience of the implementation of this scheme.
